## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Intengan (US 4,173,792) in view of New (US 3,735,420). Intengan discloses a necktie (14) including a necktie main body (16) resembling a traditional necktie form having a front, neckband, and rear sections with a necktie knot structure (40) that has a regular octagonal shape as shown in figure 2. Further, the knot structure is removable with female (60) and male (58) fasteners on opposite face sides thereof as also shown in figure 2. Also, the knot structure resembles an irregular octagonal shape when an imaginary line, parallel to the longest line of the shape is drawn at the midpoint thereof as shown in figure 5. However, Intengan does not show the main body and the knot structure being reversible.

New discloses a reversible necktie having a main body (3) and a knot structure (9) with the main body having two face sides with each of the face side including two material

pattern sections (10, 11) which resembles approximately one half of a traditional necktie form cut in an angular manner near the centermost portion of a neckband area with a traditional angular seams running near thereof, col. 2, lines 1-20 and as shown in figures 1, 2 and 4. Furthermore, the assembly includes interfacing (8,13) between the material face sides, col. 2, lines 10-20 and as shown in figure 1.

It would have been obvious to one skilled in the art at the time the invention was made to provide the main body and the knot structure of Intengan being reversible with each side having different pattern sections as taught by New so that the user can easily wear the necktie as required for a particular application or end use thereof.

#### ***Allowable Subject Matter***

3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
